

Menlo Security Professional Deployment Services

Minimizing the Time to Protection, with No User Impact

Menlo Security Professional Deployment ensures that customers are able to realize the value of their investment as swiftly as possible while limiting any business disruption, including to the end-user experience. We supplement your technical team in conducting a successful launch across all points of user access and all teams involved in managing your policies and security. Our experts will guide you through the design and deployment of Menlo Security in your environment to safely enable remote networks and mobile users in the cloud.

Deployment Services Overview

Menlo Security Professional Deployment leverages our experience and lessons learned from many successful customer deployments. Our team consists of experts with years of experience in configuring and managing different network security solutions, as well as in-depth knowledge of our products. We offer professional engineering and project management resources to provide your organization with support and guidance through the four phases of our deployment process.

Our Methodology

To ensure a successful deployment, our services are delivered in four clear stages with defined milestones, and we partner with our customers to be certain that cross-functional alignment is achieved with clear documentation. First, in the planning stage, we make sure we have the right information about your environment and the key milestones. Once we have the stakeholders and goals defined, we start working on the integration and configuration stage, before moving to the rollout stage. Once deployment is complete, we provide a seamless handoff to your organization and close the deployment.

Key Benefits

Rapid Security Protection

- Businesses immediately benefit from advanced threat protection, access to threat updates, and new features.

Instant Value, Minimal Effort

- Minimize the effort needed by your IT, security, and audit teams to learn, integrate, and deploy your Menlo Security solution.

Disruption-Free Deployment

- Ensure that your Menlo Security product configuration is aligned to your business goals right from the start.

The Four Stages of Deployment

STAGE 1:		STAGE 2:		STAGE 3:		STAGE 4:
Planning— Defining Success for Deployment		Integration & Configuration— Building the Pillars of the Deployment		Rollout— Instant Value of Menlo Security		Handoff & Closeout of Deployment
Handoff	Definition	What to Configure	What to Test	Pilot	Production	Knowledge Transfer and Training
Handoff from Sales	Complete Design with Customer	Traffic Forwarding	Business Process Sign-off	Users for Pilot	All Users	
Key Use Cases for Delivery	Document Plan	Authenti- cation	Key Applications	Test 1 Site	All Sites	Documentation
	Migration Steps	Policy and Reporting		100 Users	All Devices	

Service Options

	Scope	Menlo Deployment Services
Planning: Defining Success for Deployment	Architecture	YES
	Design Plan Project Management	YES
Integration & Configuration: Building the Pillars of the Deployment	Traffic Forwarding Options	IPSEC, GRE, PAC, AGENT
	User Authentication Options	SAML
	Business Process Alignment & Support	YES
Rollout Instant Value of Menlo Security	URL Filtering Policy	YES
	Isolation Policy Setup	YES
	CASB Policy Setup	YES
	DLP Policy Setup	YES
	Reporting Setup	Built-in Analytics + SIEM Integration
	Business Process Alignment	YES
	Test Cases & Pilot Stage	YES
	Production Configuration Support	YES
	SSL Inspection	YES
	Mobile Devices (iOS/Android)	YES

Note: Deployment Services do not include full-time, on-site, dedicated engineering or technical project management resources. These services can be added for an additional fee.
