

Real-Time Performance Metrics

December 2025

Menlo Security's Advanced CDR Solution Does What Others Can't

- 7+ Billion Files Sanitized To-date
- Zero Breaches
- 100,000+ Files Processed Per Hour
- 0% False Positives
- 180+ File Types, Including Password-protected Archives
- Simple, Seamless API for High-performance Integration

	OTHER CDR VENDORS	Menlo Cloud
Usability & End-User Experience	Flatten files into PDFs, removing active content and essential elements, rendering them static.	Retains full file usability, functionality, and fidelity.
Password-Protected & Zipped Files	Do not sanitize ZIP or password-protected files, leaving teams without options.	Sanitizes ZIP and password-protected files.
File Blockin	Blocks files with known threats, stopping all productivity in its tracks.	No files are blocked.* *For password-protected files, the file is replaced with a new, safe template and passed to the user to self-sanitize.
Templates	Original template is retained, leaving users with potential malware.	Template-based reconstruction places content on new, clean, safe template
Active Content	File is flattened, and all active content is removed, leaving end-users with less usability.	Retains active content, just removes malicious elements
False Positives	High false positive rate, causing IT teams and SOCS to waste valuable time.	0% false positive rate
Maintenance	Maintenance involved, causing indefinite delays to workforce productivity	No maintenance required; plug-and-play
Latency	Seconds to minutes, at best	Milliseconds to seconds; employees receive safe files near-instantly

Sanitization Should Be Fast. **Menlo Fast.**

About Menlo Security

Menlo Security eliminates evasive threats and protects productivity with the Menlo Cloud. Menlo delivers on the promise of cloud-based security—enabling zero trust access that is simple to deploy. The Menlo Cloud prevents attacks and makes cyber defenses invisible to end users while they work online, reducing the operational burden on security teams.

Menlo protects your users and secures access to applications, providing a complete enterprise browser solution. With Menlo, you can deploy browser security policies in a single click, secure SaaS and private application access, and protect enterprise data down to the last mile. Secure your digital transformation with trusted and proven cyber defenses, on any browser.

Work without worry and move business forward with Menlo Security. © 2025 Menlo Security, All Rights Reserved.
