

# Zero Trust Data Detection and Response

Real-time Data Security  
for File-borne Malware  
Threats and Privacy Risks

**Votiro is proactive data detection, threat prevention, and privacy and compliance rolled into one seamless platform.**

Votiro's Zero Trust Data Detection and Response platform gives organizations the ability to stop known and unknown file-borne threats **and** mask privacy risks in real-time. Votiro also provides in-depth threat analytics so IT can better understand current risks and future threats without sacrificing productivity or slowing down.

**Votiro protects major industries** across the globe, including:

- Financial Services
- Healthcare
- Shipping and Logistics
- Media Outlets
- Law Firms
- Insurance
- And More

**Votiro Plugs the Gaps  
Left Behind by AV,  
DSPM, EDR, DLP, and  
Prevents Zero-days**

Plus, you can safely download,  
upload, and share **200+ file types**  
without losing functionality.

# Data Security without Compromise

From uploads to endpoints, **data flows everywhere**. This makes visibility and mitigation nearly impossible for IT teams to keep up with. More importantly, it allows **malware and privacy risks** to make their way into an organization - causing breaches and distrust.

**Votiro solves this problem.**

## Votiro is Cybersecurity In Motion

### Real-time Data Detection and Disarming/Masking

Votiro detects known and unknown threats in content attempting to enter your organization, then proactively disarms the file before it ever reaches the endpoint.

### Unified Threat and Privacy Analytics for Visibility

Votiro delivers in-depth, actionable insights as content flows in. This enables organizations to remain in control and make the best decisions for their business.

### Automated Remediation to Reduce Workloads

Automatic threat mitigation allows your team to spend less time quarantining and blocking files, while also reducing false positives. This equals less noise in the SOC.

## Try Votiro Free for 30 Days

Take a free 30-day trial and see how Votiro stops threats and privacy risks before they ever reach your endpoints.
