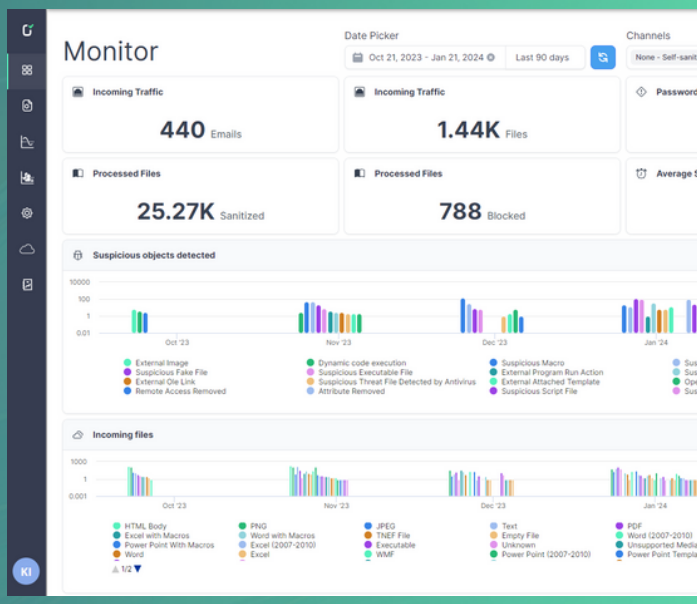
VOTIRO

Actionable, In-depth Threat Analytics

Why Analytics are the Key to Successful Cybersecurity



The threat landscape is both complex and fast moving. As organization footprints expand, so do the variety of attack vectors - leaving bad actors with new pathways to circumvent security tools. **That's why Votiro Cloud provides comprehensive threat analytics to enable security teams with the insights they need** to respond efficiently, promptly, and prepare for future attempts.

Visibility into threat entry points is lacking for many organizations:

According to hundreds of cybersecurity professionals, 36% report not having adequate visibility into their channels.* This leaves a large margin for error and vulnerability to breaches.

71% of cybersecurity professionals report an incident caused by a malicious file in the past 12 months.*

Alarmingly, 33% think it's possible but aren't even sure.

Shifting from Reactive to Proactive

Votiro incorporates external data sources and threat feeds into comprehensive analytics to help teams **identify and understand currently active attacks**. By analyzing these data streams, organizations can discern patterns and trends in cyber attacks, enabling them to **anticipate and prepare for shifts in attack methodologies**.

Going Beyond Traditional Solutions

Votiro transcends the capabilities of traditional analytics commonly seen in antivirus software and sandboxing techniques. By focusing on **a more granular level of analysis**, Votiro's unique approach is both proactive and preventive, allowing users to understand and **counter threats with a precision and depth that goes beyond the industry norms**.

Eliminating All the Noise

SOC teams get **actionable insights to efficiently and effectively investigate true positives**. By focusing on accuracy and relevance, Votiro's Threat Analytics Dashboard significantly **reduces the number of false positives** – a common challenge that can lead to alert fatigue and distract from genuine threats.

Votiro's Pillars of **Data Security**

Proactive Data Detection & Disarming of Weaponized Content

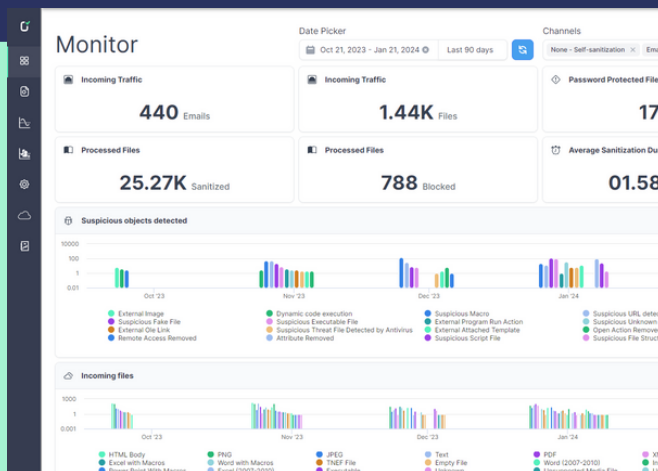
Votiro detects known and unknown threats in content attempting to enter your organization, then proactively disarms the file before it ever reaches the endpoint.

Unified, In-depth Analytics for Threat, Privacy, and Compliance

Votiro delivers in-depth, actionable insights as content flows in. This enables organizations to remain compliant and make the best decisions for their business.

Automated Response to Reduce Work for SOC and Data Security

Automatic threat mitigation allows your team to spend less time quarantining and blocking files, while also reducing false positives. This equals less noise in the SOC.



Try **Votiro Cloud** Free for 30 Days

See how Votiro stops threats before they ever reach your endpoint with a **free trial!**
